

Trier University of Applied Sciences (Food Technology)

With around 7,600 students, Trier University of Applied Sciences is the second largest University for Applied Sciences in Rhineland-Palatinate. A strong focus on application and practice, innovative teaching methods, and the strong combination of teaching and research characterize our studies.

On three campuses we offer 80 degree programs in the fields of Mechanical Engineering, Electrical Engineering, Civil Engineering, Building and Supply Engineering, Food Technology, Computer Science, Games, Therapy Sciences, Economics, Law, Environmental Studies, Architecture, and Design, thus presenting a diverse educational program unique in the region.

Our location in Germany's south western tri-border area with its access to international connections and its varied opportunities for employment in Luxembourg, France and Belgium create the ideal conditions both for study and for a professional future.

A course of study at Trier University of Applied Sciences means an education with a strong practical focus combined with a solid theoretical foundation, and includes supervised projects, a practical semester or a study semester abroad.

Through our excellent business contacts we can offer our students plenty of opportunities for applied research and works, thus ensuring our courses remain up-to-date and meet the demands of potential employers.

The Department of Nutrition and Household Technology was founded in 1978. Reforms of the study programs led to what is nowadays the course in Food Technology.

In 2005 this was incorporated into the Department of Civil and Supply Engineering + Food Technology.

Trier University of Applied Sciences has been offering the Bachelor Degree course (B. Eng.) in Food Technology since the Winter Semester 2005/06.

From the Summer Semester 2012, the range of courses was been complemented by the Master Degree (M. Eng.) in Food Economy.
