

My time as an exchange student at Trier University of Applied Sciences was just amazing! When you go abroad you are nervous about how the courses and lectures will be and if the teachers are good in English. I can just say that the I got really impressed, everyting was great! Also the International Office were great, very helpful and serviceminded.

Trier is a really pretty town with some nice shops and a lot of history. One thing that I really appreciated was the student card which gave me free access to public transport. This card gave me the opportunity to see a lot of the surroundings and other villages.

I had a lovely time during my exchange period, I gained a lot of experience and improved my English. I met a lot of lovely people and the time in Trier will I remember for the rest of my life. I can really recommend Trier University of Applied Sciences if you want a good school with high competences!
