

Shaping the future of healthcare, together.

We are looking for you for our R&D, located in **Vienna**, as a
Junior Web Developer (m/f/d)

Your Tasks

- Development of enterprise Web applications for healthcare
- Development of reusable UI components for mobile and desktop application
- Development of automated tests to ensure the quality of your developed components
- Close cooperation with our UX designers
- Active participation in the SCRUM process
- Participation in specification, design and technical documentation of new application parts
- Collaboration on architecture and design of the overall system

Whom we are looking for

- Study of computer science (university, FH, medical computer science advantageous, but not mandatory) or equivalent experience or knowledge of agile software development (SCRUM)
- Good knowledge of one or more of HTML5, CSS3, TypeScript and/or Javascript, Angular
- Experience with tools such as Subversion, GIT, Maven, Docker advantageous
- A high degree of personal responsibility
- Independent and target-oriented way of working
- Highly motivated and team player
- Very good knowledge of written and spoken English

We offer you

A relaxed start-up atmosphere with the stability of an established international group. You are part of a first-class, creative and innovative team. You have creative leeway and a high degree of influence on your own work. You will be integrated into the visions and goals of the company.

Be part of our innovative power and shape the future with us!
