DevOps Trainee

We, at Arŋs, want to build teams based on **young peoples** who desire to perform, improve their skills, and build a **rewarding career**.

To these **brilliant minds**, we offer the best place to work, the most interesting projects using the **latest technologies**, always in a practical domain where they **can immediately see** the impact of their **own progress**.

You are **talented**, **motivated** and **ambitious**? Then, we will be more than happy to **meet you**!

#Keywords

- Docker;
- Kubernetes;
- Ansible;
- Linux;
- AWS;
- Heroku;

As a DevOps trainee, you will:

- Your main task will be to support the cross-team initiative to improve continuous integration and continuous delivery process
- You will start this internship by performing an assessment of the current situation.
- You will discuss path to improvement with the internship supervisor and then lead the implementation of the suggested improvements.

- Among the topics you will cover:
    - integration of container platforms (like Kubernetes) and Cloud services to perform the automated deployments
    - improving management of the fleet of build VM we have
    - automation whenever needed with that respect, e.g. monitoring and alerting
    - support to each team in the development of their CI/CD pipeline

We are looking for a student:

- Curious and creative;
- In the love of code;
- Team player;
- With an interest for state of the art technologies;
- Autonomous and dynamic;
- Fluent in French and English.

What we offer to the candidate:

You will join an existing team and be fully involved in the project. This will be a unique opportunity for you to work on a strategic tool that will be used by the community. You will be integrated in an exciting company hiring dozens of young graduates each year. If you want to grow up with us, please send us your CV.
